Dr. Donald Nease Jr. Joins Cielo MedSolutions as Chief Medical Officer

Leading University of Michigan family practice researcher joins Ann Arbor firm

ANN ARBOR, MI – August 8, 2006 – Healthcare IT company Cielo MedSolutions has named Dr. Donald Nease Jr. as chief medical officer, responsible for clinical development strategy.

A family physician researcher in the department of family medicine at the University of Michigan, Nease helped develop [ClinfoTracker](#) – the precursor to the Cielo Clinic™ software product – to improve, document and report on clinical care. His family medicine research has been funded by the National Institutes of Health, National Cancer Institute and the University of Michigan.

Nease has long had a standing interest in the use of information technology in primary care beginning with his residency in family medicine. Nease will continue his research into how primary care practices can use systems such as Cielo Clinic to deliver high-quality care in a constantly changing practice and reimbursement environment.

“Dr. Nease’s clinical primary care experience and his knowledge of information technology will prove invaluable to our clinical operations and product strategy,” said David Morin, president & CEO. “As a physician respected for his work in primary care, Dr. Nease will ensure our relationships within the medical community.”

About Cielo MedSolutions

Cielo (pronounced “see EL oh,” Spanish for “sky”) provides healthcare software and information technology services. Founded in Ann Arbor, Michigan in 2005, Cielo helps ambulatory care physicians improve quality-of-care, optimize practice efficiency, and increase physician revenue. The company’s web-based Cielo Clinic™ software helps to improve, document and report on clinical care.
