## **Cielo MedSolutions Announces Affiliate Marketing Partnership with Industry Thought Leader**

*Medical Data Solutions to promote Cielo Clinic™ within medical practice community*

ANN ARBOR, MI – June 13, 2007 – Healthcare information technology (IT) company Cielo MedSolutions has entered into an affiliate marketing partnership with Medical Data Solutions of Midland, Michigan. Under terms of the agreement Medical Data Solutions will qualify and develop sales leads for Cielo MedSolutions' line of chronic condition care management software and services.

Medical Data Solutions provides customized and proactive business management solutions for the healthcare industry. Medical Data Solutions is led by Sharon Libell Leenhouts, MHSA who has over twenty five years of experience in the healthcare industry with a special emphasis on healthcare informatics and data analysis. MDS focuses on making data into information and helping healthcare industry leaders make informed decisions.

“Cielo MedSolutions genuinely focuses on helping primary care physicians optimally manage their patients' care,” said Sharon Libell Leenhouts, president of Medical Data Solutions. “Cielo understands that information technology will only help if it fits seamlessly into the clinical workflow. Cielo Clinic software offers record keeping and reporting that improves the management of a medical practice. It facilitates more effective communication with insurers and can, ultimately, lead to a higher quality of patient care delivery.”

“We are excited to partner with a leading firm in the field of healthcare informatics and practice management data analysis,” said Dave Morin, president & CEO. “Medical Data Solutions' constant touch with the primary care practice marketplace will certainly speed adoption of our products.”

### **About Medical Data Solutions**

Medical Data Solutions provides customized, proactive business management solutions for the healthcare industry. By making information out of data, Medical Data Solutions lends insight into important business decisions to improve performance and increase efficiency.
