Leading Michigan Health System Implements Clinical Quality Management System from Cielo MedSolutions

St. John Health System turns to Cielo Clinic™ for enhanced quality in primary care settings

ANN ARBOR, MI – MARCH 28, 2007 – Several leading family practice clinics of St. John Health System of southeast Michigan will implement Cielo Clinic™ – a [clinical quality management \(CQM\) system](#) – to enhance patient care and operational efficiency.

While the main focus is improving preventative care and disease management, St. John Health System also will use Cielo Clinic to analyze quality measures across patient demographics and diagnoses, and to create reports for clinical quality and physician incentive programs.

Using a comprehensive and dynamic [chronic disease and multi-problem registry](#), Cielo Clinic creates “clinical dashboards” that contain information relevant to the patient visit such as required lab tests for patients with chronic diseases such as diabetes, and needed preventative screenings, such as Pap smears, colorectal cancer screens, and mammograms.

“Working with one of the largest health systems in Michigan underscores the benefits of Cielo Clinic to physicians, health administrators and patients,” said Dave Morin, CEO of Cielo MedSolutions. “Dynamic information at the fingertips of St. John’s primary care physicians will have a demonstrative impact on the quality of primary care.”

St. John Health is comprised of eight hospitals plus more than 125 medical facilities in southeast Michigan.

About Cielo MedSolutions

Cielo MedSolutions (pronounced “see EL oh,” Spanish for “sky”) is a leading provider of healthcare software and information technology services. Founded in Ann Arbor, Michigan in 2005, Cielo helps ambulatory care physicians improve quality-of-care, optimize practice efficiency, and increase physician revenue. The company’s web-based Cielo Clinic™ software helps to improve, document and report on clinical care. www.cielomedolutions.com.
